Cost: \$199

1 Day Solar PV Introduction and Market Overview April 17 / 9:00 AM - 5:00 PM

Purpose of Course

This 7 hour seminar provides a thorough introduction to solar Photovoltaic technology, applications and the local market. It teaches participants about the fast-growing PV industry, how to enter the market and the benefits of solar. It covers system cost, government incentives and the nature of renewable energy investments. It is geared towards general contractors and professionals with a strong interest in solar PV.

It is also suitable for building-owners and homeowners who are considering adding solar PV.

Topics covered:

- * History of Solar
- * How it works?
- * What makes up a PV system?
- * Different types of PV systems
- * Solar Applications
- * Local solar market overview and analysis
- * Enter the PV market
- * Return on Investment

This course is geared towards Electricians, Engineers, PV Professionals and anyone with a strong interest in PV.
